

FLAIL MOWER

- It has durable knives operating by rotating vertically to soil surface and connected as jointed on mangles.
- It has the features of protecting cutting height, knife endurance and balance sensitivity even if the soil surface is rough by means of its adjacent sledges and mangle behind.
- It provides recycling as organic fertilizer by disintegrating scapes such as wheat, sunflower, cotton, corn, rice, tobacco and bushes, trimmed fruit tree branches and vine shoots.
- The machine has Hydraulic model providing slide by allowing control through tractor hydraulic arms of the machine on the purpose of providing usage easiness in orchards and vineyards.
