

# TRAILED X TYPE HEAVY DISC HARROW

- High resistible, heat treated discs notched at front and plain at rear or alternated.
- Transport tyres also ensure optimum working depth control.
- Ease and speed of set-up into the work/t-transport position.
- Easy gang angling adjustment with locking device standart manual or Hdroulic (Optional).
- Increased inter-disc spacing and disc scrapers preventing trash built up.
- Spacers and bearing housings made from steel for trouble free long working life.
